Welcome

We Welcome Sofía Ramírez Gelpí, Ph.D., as our new dean of academic affairs, overseeing Community Education and the Languages and Communication, and Applied Behavioral Sciences departments.

Dr. Ramirez-Gelpí began her career at Allan Hancock College in 2000 as a professor of Spanish, a passion she continues part-time. She holds a B.A. in biological sciences and M.A. in applied Hispanic linguistics, both from the State University of New York at Stony Brook. She earned a Ph.D. in Spanish and Hispanic linguistics from the University of Southern California. She taught at many colleges in the Southern California area, from California State University, Los Angeles to Harbor College, El Camino College, Glendale Community College, Mount St. Mary’s College, and Santa Monica College. It was a two-year lecturer contract to teach at Cal Poly, San Luis Obispo, that brought her to the Central Coast.

However, her biggest move was not from LA to Santa Maria. With a goal to pursue a degree in higher education, Dr. Ramirez-Gelpí came to the United States from Puerto Rico carrying two bags: one had her clothes; the other had books. “It was the winter of 1985 when I arrived in New York, and I didn’t have proper clothing to deal with the cold, Long Island weather,” she recalled. “I had no money when I came, no clue as to how the educational system worked, no clue as to how the U.S. system worked, and minimal knowledge of spoken English. However, I had dreams and a vision of what I wanted to accomplish, and the will to work hard to make that happen.”

And make it happen she did. Living temporarily with her uncles on Long Island put her close to Stony Brook University, where she made use of their rolling admissions program to register in classes that following spring. “It was my grand-uncle who gave me the money to pay my very first tuition in spring 1986. He made it possible for me to attend.”

Upon graduation from Stony Brook in 1990 with her master’s degree, she was accepted to USC and continued her educational journey westward, literally driving solo from New York to LA. Not knowing where she would live or how much she might pay for tuition, she also discovered quickly that LA was a driving city, and that the car she had would not last long. “So, I found myself using a bike to go to school and dependent on whatever was around the USC campus for shopping.”

Whether walking or biking to campus, Dr. Ramirez-Gelpi earned her Ph.D. in Spanish in 1995.

“I really believe in the power of education,” Dr. Ramirez-Gelpí said. “And here at Hancock’s Community Education, students have many learning and lifelong enrichment opportunities. We have students who never thought they could go to college, and upon coming to us they discover they can. They become inspired to pursue more, transition into credit programs, and transfer to four-year universities, or they learn new skills to remain competitive in the job market.”

“Here at Community Education, dreams really do come true!”
Join us for this exciting series!

Student Spotlight

Mireya Morales

I enrolled in GED classes because I wanted to finish my studies and perhaps go into nursing. It has not been easy for me in many respects. I have been out of school a long time and have been taking care of my daughters. But, my instructors have provided guidance and helped show me the path to follow. Now, I have only three more subjects to complete and will continue until I reach my goal. I will have my diploma soon! It’s so important to finish your studies; never give up, even if it seems a difficult task.

Rafael Gomez

There are so many resources here at Hancock to take advantage of—great teachers, classes, and a great environment! My instructors have motivated me to always move forward and keep going. I enrolled here because it is important for us who come from other countries to become well acquainted with the language and the culture of America. I do not want to miss the many opportunities this country offers. I was a Spanish teacher in Mexico and have the fundamentals of grammar. Now I am developing English listening skills in a GED class and hope to become a Spanish instructor here at Hancock.

Open up YOUR door to better paying jobs, new careers, college classrooms, and a brighter future!

GED classes can help you successfully pass the General Educational Development (GED) preparation test, the high school equivalency exam. Get started now. See class information beginning on page 24.

A WORD ABOUT OUR MAILING:
Mailing Spectrum to the public may seem costly. However, we have explored numerous methods of distribution and this one (using the US Postal Service bulk mail process) is still the most efficient for the money. It costs approximately .07 cents to mail you this schedule (because it is addressed to residential customers) versus $1.10 or more if you phoned to request a Spectrum be sent to you. In addition, printing costs per Spectrum are relatively low at about $0.07 each. Because Allan Hancock College serves tens of thousands of people in our community, we feel it is important to keep you informed about our programs. As costs increase, we will continue to examine distribution methods to ensure cost effectiveness. If you should receive a duplicate copy of this Spectrum, or if you cannot use this schedule, please pass it along to a friend or associate. This Spectrum is printed on recycled paper and can be recycled.
